EMPLOYER PROFILE

The Tai Laboratory at Universite de Sherbrooke is seeking a graduate student and postdoctoral fellow to lead preclinical and translational studies on the immune cell response in breast/bladder/pancreatic/bile duct cancer progression and viro-immunotherapy. We use immunologic assays, mouse models and human organoids to study poor prognosis cancers. Our main goal is to develop precision viro-immunotherapies. We are a highly collaborative group situated in the Institute of Cancer Research of UdeS on the health campus of the Université de Sherbrooke. Located in the Eastern Townships, 1.5h south of Montreal (30 mins from Vermont), Sherbrooke offers a beautiful setting for work-life balance.
